DETAILED ACTION

Allowable Subject Matter

1. Upon further consideration, the application does not contain allowable subject matter.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1 and 3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 5,242,249 to Grayson.
- Regarding claim 1, Grayson teaches, in Figure 1, a construction board having an integrated fastening means (10) for mounting the construction board. Figure 2 shows the fastening means (10) comprises a cage (24) arranged in the board and a screw (20, 52) arranged in the cage (24). The screw is telescopic that has mounted and dismounted positions. The screw has two parts, a first part (52) that is telescopically received in the second part (20). These parts must have the same thread pitch since the first part (52) screws into the second part (20) (Column 3, Lines 38-43).
- Regarding claim 3, Grayson teaches, in Figure 2, that the two telescopic screw parts are formed with carrier members [head of bolt (52) and edge of coiled member (20)] that make them capable of engagement with a tool so they can be screwed.

Art Unit: 3635

Regarding claim 4, Grayson teaches, in Figure 2, that the carrier members are projections that are capable of engagement with a tool. Grayson does not teach the second part is engaged after the first part is screwed into the construction material. However, these claims are for the product and not the process so the patentability depends on the final product, not the process for making the product.

- Regarding claim 5, Grayson teaches, in Figure 2, that the first part (52) is formed with a head that abuts against the shoulder of the second part (20) when the first part (52) is screwed into the second part (20).
- Regarding claim 6, Grayson teaches, in Figure 2, that the second part (20) has a collar that will abut a shoulder of the cage (24) when the second part (20) is screwed into the construction material.
- Regarding claim 7, Grayson teaches that the construction materials (34 and 36) are that of a truss (Column 3, Lines 3-4) which is typically made from metal (Column 3, Lines 47-49).

Response to Arguments

4. Applicant's arguments/amendments with respect to claim 1 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew J. Triggs whose telephone number is 571-270-

Application/Control Number: 10/582,487 Page 4

Art Unit: 3635

3657. The examiner can normally be reached on Monday through Thursday 6:30am -

5:00pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen Lillis can be reached on 571-272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
